

## **BOLLINGER CANYON ROAD WIDENING – CITY HALL DRIVEWAY CONSTRUCTION**

Construction continues on the Bollinger Canyon Road Widening Project, from the I-680 Freeway to east of Market Place, with completion anticipated in fall 2018 prior to the City Center Bishop Ranch opening.

Beginning as early as January 10<sup>th</sup>, weather permitting, Granite Construction will install a new stamped concrete driveway at the entrance to City Hall. To facilitate this work, the main City Hall driveway at Market Place will be closed. This is in addition to the closed existing minor City Hall driveway to the west (see below driveways circled in red). Drivers will not be able to access City Hall through these driveways and will be detoured to use the two eastern driveways instead (see below driveways circled in blue). Parking in front of City Hall will not be available during this time. Temporary ADA parking will be assigned to spaces closest to the City Hall building for use during construction (see below parking spaces circled in green). This detour and temporary ADA parking is expected to be in place for approximately four (4) weeks while the work is being completed.
