SMALL WIRELESS FACILITIES PREAPPROVED DESIGN NOTICE

(CITY COUNCIL RESOLUTION NO. 2019-087 - SECTION 12 PREAPPROVED DESIGNS)

PURPOSE:

This notice is prepared in accordance with the Council Policy on Small Wireless Facility and Other Infrastructure Deployments Within the Public Right-of-Way (Policy), adopted by City Council Resolution No. 2019-87, and posted at City offices and the City website to inform the public of the preapproved small wireless facility designs.

APPLICATION

Application Number: AR 19-200-067
Applicant: GTE Mobilnet of CA (dba Verizon)
Application Filing Date: August 20, 2019
Project Location: Citywide

Action:

On September 12, 2019, the Architectural Review Board (ARB) reviewed two designs of small wireless facilities and recommended the final approval with comments to the Community Development Director. The ARB recommended the use of a uniform pole, such as Type 15 streetlight standard, for all small wireless facilities, which must be painted to match the existing structures, and further recommended the proposed small wireless facility for all zones.

On October 2, 2019, the Community Development Director found that the designs of small wireless facilities as recommended by the ARB with comments substantially comply with the design standards in the Policy and approved as Preapproved Designs for both residential and non-residential zones.

Design Descriptions:

The approved small wireless facility consists of a pole-top mounted antenna inside an approximately 14.75 inch-diameter shroud on a 30-ft. tall Type 15 streetlight standards or approved equal poles, and a separate array of three antennas at approximately 25 ft. above grade, plus a radio unit and associated switches at least 10 ft. above grade. In addition, there is a power pedestal at the base of the poles.

Effective Date:

The preapproved designs with this action will be **effective on October 19, 2019**, unless a written appeal to the city Manager is filed with the City Clerk's Office by **5:00 p.m. on Friday, October 18, 2019**.
