

## NOTICE OF CONSTRUCTION

### PG&E CCTV SEWER AND STORM LINE INSPECTION TWIN CREEKS SOUTH UNIT 3 SUBDIVISION AREA

#### Planning Construction Period: August 2020 to September 2020

This project is part of PG&E's safety upgrades to their natural gas distribution system, including individual service lines. The PG&E Gas Line Replacement Project is proposed to start early next year. This is a similar project to work that has been already completed by PG&E in the Morgan Drive area.

In preparation for this project, PG&E's contractor, Express Sewer and Drain, Inc. (ESDI), will be performing CCTV inspections of the sanitary sewer and storm drain system, both in the City's right-of-way and on private property. These inspections are being performed to ensure that there are no PG&E cross bores that exist with the existing sewer and storm drain lines. If a cross bore is found, the contractor will mark the location and notify PG&E, who will then determine the necessary repair or maintenance, under a separate Encroachment Permit application.

- Project scope: consists of three 9-person crews working simultaneously at different locations. No digging or excavation is required. Crews will be accessing the manholes and catch basins in the right-of-way on the following streets (see attached map):
- Limits of work: Twin Creeks Unit South 3 Subdivision Area on the following streets (see attached map).

Ayamonte Court	Monasterio Court	Santander Drive
Cardona Circle	Palamos Court	Talavera Drive
Lorca Court	Roatan Court	Valdivia Circle
Mesa Vista Drive	Saba Court	
- Work schedule – August 2020 to September 2020
