

## NOTICE OF CONSTRUCTION

### PG&E GAS LINE REPLACEMENT PROJECT UPDATE IN THE TWIN CREEKS HILLS SOUTH AREA

**Planned Construction Period: April 15, 2020 to December 2020**

Work under this Encroachment Permit began in February and is being conducted by PG&E for their Gas Line Replacement Project in the Twin Creeks Hills Subdivision, Units 2 and 3 as shown on Exhibit A. This project is part of PG&E's commitment to safety and upgrades to their natural gas distribution system, including individual service lines. This Project will affect the following streets:

**Twin Creeks Hills Unit 2:**

Barnwood Drive    Bridlepath Court

**Twin Creeks Hills Unit 3:**

Apache Court	Longhorn Court	Seminole Court
Cree Court	Mohawk Circle	Sombrero Circle
Hawkins Drive	Morgan Drive	Trailview Court

This work began prior to the first County Health Order regarding the COVID-19 outbreak. Once the initial County Health Order was issued, PG&E halted all operations. Since the issuance of the revised County Health Order on March 31<sup>st</sup>, "*projects immediately necessary to the maintenance, operation, or repair of essential infrastructure*" are allowed to continue during the Shelter in Place Order. PG&E requested to resume work on the gas line replacements and after review by the City Attorney and with the intent of the new County Order, this work is approved to recommence.

Staff has had conversations with PG&E regarding practicing all required safety protocols mandated by the County Health Order when work resumes. Staff has asked that all field personnel be extremely sensitive to the residents affected by the work.

The permit consists of the excavation, trenching, installation of approximately 11,000 feet of conduit, lateral lines, and restoration of the streets and sidewalks on the Twin Creeks Hills streets mentioned above. The final restoration work will require PG&E to micro-surface or slurry seal the roadway due to all the proposed trench cuts and overall scope of work.
